

RAISS Forum Workshop on ISO/IEC 17799:2005 (E)

If your business is using, applying and thinking of using ISO/IEC 17799 and want to know about the future ISMS trends, then this is an essential Workshop for you to bring you right in focus of what is going on internationally.

Jointly organized by the Regional Asia Information Security Standards (RAISS) Forum, IT Standards Committee (ITSC) and the Security Chapter of the Singapore IT Federation (SiTF), this workshop goes through what is in the New Edition of ISO/IEC 17799 (2005 version) and explains the progress in the area of ISMS standardization. This is an excellent opportunity to hear directly from Dr Angelika Plate, internationally recognized ISMS and risk consultant and co-editor of the new edition of ISO/IEC 17799, together with Mr Ted Humphreys, acknowledged father and management guru of the ISO/IEC 17799 and ISMS (BS 7799) standards and the global BS 7799 certification movement, as well as the Chair of the ISO group responsible for this work, on what the changes are, the drivers behind this new standard, certification aspects and future trends in ISMS standardization.

Biography of Mr Ted Humphreys

Mr Ted Humphreys (Chartered Fellow of the BCS - FBCS CITP, CISM) is the Director of XiSEC Consultants Ltd, a UK company providing Information Security Management consultancy services around the world. He has been an expert in the field of information security and risk management for more than 27 years. During this time, he has worked for major international companies (in Europe, North America and Asia), as well organisations such as the European Commission and the OECD.

Mr Ted Humphreys, the internationally acknowledged father and management guru (and some say spiritual leader) of the ISO/IEC 17799 and ISMS (BS 7799) standards and the global BS 7799 certification movement, has been: the editor of BS 7799 Part 1:1999, ISO/IEC 17799:2000, the 1999 and 2002 editions of BS 7799 Part 2 the ISMS standard and the EA 7/03 the ISMS accreditation guidelines. He is the Founder and Director of the ISMS International User Group and is responsible for the International Register of BS 7799/ISMS Certificates. In 2002 he was honoured with the Secure Computing Lifetime Achievement Award. This international award recognises his noteworthy achievements in shaping and promoting the development and standardisation of information security management BS 7799 best practice standards.

Biography of Dr Angelika Plate

Dr Angelika Plate runs the German based information security consulting company ÆXIS Security Consultants, and has worked with many companies in different ISO/IEC 17799 and BS 7799-2 projects to establish, implement, maintain and improve ISMS. Prior to establishing ÆXIS during end of 1997, she was employed by BSI (the German Information Security Agency) as a senior information security expert.

She has been involved in ISO activities for many years, where she was acting as the editor of two international standards dealing with risk assessment, control selection and risk management, and has just finished as an editor of the revised version of ISO/IEC 17799, which is now about to be published. Prior to that, she was involved in the revisions of BS 7799 Parts 1 and 2 in the United Kingdom. She is also working as technical support for UKAS assessors, and is chairing the ISMS International User Group (IUG) Germany, which she founded in 2002.
